PANEL

## COVID-19 Fraud Watch

# MINUTES

**GROUP:** COVID-19 Fraud Watch Group

The COVID-19 fraud watch group is a cross-sector and cross-industry coalition of trusted partners (including the Cabinet Office and City of London Police) who meet weekly to share information on emerging fraud threats and trends affecting business. It aims to act as a conduit to warn the public, private and third sectors about COVID-19 fraud risks and the preventative actions that can be taken. Calls are held under Chatham House rule.

**DATE & TIME:** 10:00 – 10:45 Thursday 04 June 2020

**VENUE:** Conference call

**CHAIRMAN:** David Clarke

**SECRETARY:** Zara Fisher

### 1. Welcome and introductions

David Clarke (DC) WELCOMED everyone to the call and reminded participants that calls are held under Chatham House rule. Everyone was asked to respect this to encourage frank and open discussion and the sharing of information.

- Calls are held every week at 10:00 on Thursdays, lasting no more than 45 minutes.
- The aim is to share information about current and emerging fraud threats against business and to act as an early warning system to protect others.
- Minutes will be circulated later today. These include supplementary information at the back. A short one-page summary of the key themes is also produced each week for participants to use in developing their own messaging or sharing with their members, clients, and networks.
- Moving forward we would like to encourage everyone to send us one current or emerging trend each week in advance of the call for sharing. If anyone would like to provide a verbal update on a forthcoming call, please also let us know.

### 2. Cabinet Office update

Jack Silverman (JS) from the Government Counter Fraud Function (GCFF) provided a short update on their current activities and trends affecting the public sector.

- The Cabinet Office continue to see intelligence reports through their established intelligence network. There is an understanding that it will take some time for some reports to be made due to the crisis.

- Since the launch of the NHS track and trace programme there have been reports of both smishing and phishing emails that attempt to obtain personal information or ask the individual to download a file that contains malware.
- Reports show an increase in phishing emails, in particular the impersonation of well-known staff within businesses.
- Fraudsters are also using open source data on businesses such as logos and financial data to apply for stimulus funding.

### 3. City Police NFIB update

DI Steve Jackson (SJ) from the City of London Police provided a short update on the trends being seen by law enforcement.

- COVID-19 crime reports have decreased to 138 (from 148 last week).
- Online shopping and auction fraud is still high. This is likely a reflection of changes to shopping habits.
- City of London Police hold weekly calls with the regions to share information across the country.
- 21 arrests for courier fraud have been made relating to COVID-19 fraud since the beginning of lockdown; supported by IDT and NFIB with 4 more arrests made today.
- There has been a 20% increase in investment fraud compared to the base line levels.
- City of London Police will be featured on two television shows on the BBC to raise awareness of fraud: *For Love or Money* and *Finance Matters*.

City of London Police in working to ensure that business premises in the City are secure and safe during this time and as the lockdown eases. Regular meetings are being held to ensure the City remains safe. Physical signs funded by the City of London Crime Prevention Association (CPA) have been placed close to CCTV and ANPR cameras, with the message 'If you can see this, we can see you'.

Local security advice has also been issued regularly since the lockdown began in the fortnightly Skyline newsletters. Sign up here: <https://www.cityoflondon.police.uk/advice/advice-and-information/wsi/watch-schemes-initiatives/as/city/city-alert/>. The latest edition is available here: <https://mailchi.mp/cityoflondon.police.uk/skyline-edition-1544308>

#### **Data sharing**

Several criminals involved in bounce back loan fraud have been identified on the dark web. It was suggested there might be a piece of work that the Fraud Advisory Panel could assist with on cross matching data and sharing intelligence.

- ⇒ **Members are encouraged to sign up to the Skyline newsletter that contains local security advice from the City of London.**
- ⇒ **DC (FAP) offered to put SJ in contact with Kevin Duala from The One Show.**
- ⇒ **DC to reach out to GL to discuss possible piece of work on cross data matching and intelligence sharing.**

### 4. Sector-specific updates

#### **Charity and not-for-profit sector**

- Reporting of fraud is currently low; this could be due to charities fighting for financial survival given the crisis and a decrease in internal reporting. Consequently the Charity Commission is actively promoting reporting to Action Fraud and the NCSC phishing email service.
- The frauds that are being seen are similar to those affecting other sectors, basically common frauds using COVID-19 as a hook.
- Charities are concerned about a potential increase in insider fraud. While there has been a significant drop in reporting of insider fraud during the pandemic, some charities have seen the number of reports start to increase and return to beyond normal reporting levels. This might be due to charities needing time to adjust to the current situation, which has resulted in a lag in reports.

- There has been a recent spike in reports relating to grant fraud. The Association of Charitable Foundations has produced guidance on grant fraud. Available here: <https://www.acf.org.uk/policy-practice/practice-publications/tackling-grant-fraud>
- The Charity Commission has produced guidance for charities covering the main ways they are being targeted and linking to other sources of guidance available (ie. NCSC guidance). It is also working with other sector partners including the Fraud Advisory Panel on several webinars including:
  - COVID-19 and charity fraud: what to watch out for and how to stay safe. Available here: <https://gateway.on24.com/wcc/experience/elitebba/1917599/2071337/charity-fraud-awareness-hub>
  - Preventing cybercrime for charities: getting the basics right (two-part series). Registration for this series can be accessed here: <https://www.fraudadvisorypanel.org/events/preventing-cybercrime-for-charities-part-1/> and <https://www.fraudadvisorypanel.org/events/preventing-cybercrime-for-charities-part-2/>

### **NHS track and trace**

The NHS Counter Fraud Authority are working with NHSX to identify the key fraud risks relating to the track and trace service. It was suggested it would be useful to receive an update on the fraud risks and any prevention messaging being developed.

Concerns were raised regarding the three different NHS track and trace services and the different phraseology used. There are concerns that this will cause confusion to the fraudsters advantage. It was suggested that there are opportunities for disruption in this area. If key messages haven't already been developed, they should be. Organisations – including those in this group – can cascade any core prevention messages to their communities to protect them from fraud.

### **SMEs**

The language used in prevention messaging is very important. It must be simple, clear and easy to understand to increase its success. The Fraud Advisory Panel is planning to pull together key partners to work together to learn from the past, understand the future threats, and develop some key messaging to protect business.

## **5. Roundtable of COVID-19 fraud issues and trends affecting business and industry**

There was a roundtable discussion about COVID-19 frauds (current concerns and/or anticipated) affecting (or likely to affect) business and industry.

- One of our members has raised concerns about a potential increase in the number of problem or vulnerable gamblers and gamers and in-debt students potentially leading to an increase in mule accounts and money laundering opportunities for smaller international gangs.
- There have been cases of Asian nationals charged with COVID-related scams (mainly fake PPE, masks and cures) in other countries, including the USA.
- Synthetic IDs are being used in payroll scams.
- The NSCS has warned of a Russian hacker group targeting two ministries of foreign affairs and a national parliament using the ComRat V4 malware. The malware uses a complex backdoor to steal sensitive documents and upload these to a public cloud service.
- Google is launching a new Scam Spotter to combat COVID-19 frauds.
- The National Health Service Counter Fraud Authority (NHSCFA) has seen a decrease in reports during the pandemic. They have been carrying out extensive prevention work with a focus on procurement fraud.
- The Fraud Advisory Panel's Future Fraud Professionals Network are holding their first online pub quiz this evening Thursday 04 June. Register here: <https://www.fraudadvisorypanel.org/events/ffpn-quiz/>

- ⇒ JS to reach out to LE for an update on the ongoing fraud prevention work concerning the NHS track and trace service.
- ⇒ ZF to invite MA and OS to provide updates at the next meeting on Thursday 11 June.

**6. Date of next conference call**

10:00 – 10:45 on Thursday 11 June 2020. Calls will be fortnightly thereafter.

## COVID-19 Fraud Watch

# SUPPLEMENTARY INFORMATION

**GROUP:** COVID-19 Fraud Watch Group

The COVID-19 fraud watch group is a cross-sector and cross-industry coalition of trusted partners (including the Cabinet Office and City of London Police) who meet weekly to share information on emerging fraud threats and trends affecting business. It aims to act as a conduit to warn the public, private and third sectors about COVID-19 fraud risks and the preventative actions that can be taken. Calls are held under Chatham House rule.

**DATE & TIME:** 10:00 – 10:45 Thursday 04 June 2020

---

### Updates received from other participants

Subsequent to the meeting a number of participants provided additional information for sharing with the group.

- A ghost broker has been identified to be selling fraudulent care insurance and offering NHS workers a discount.
- BDO has found that the total value of UK fraud has more than doubled in the last year to £1.7bn, <https://www.bdo.co.uk/en-gb/news/2020/value-of-uk-fraud-more-than-doubles-in-a-year>
- In Hong Kong there may be an increase 'legal cases' by landlords against commercial tenants which might result in an increase in 'self-justified' poor behaviours by some defaulting tenants.
- Contact tracer spoofing has already begun following the launch of the NHS track and trace service, [https://www.theregister.com/2020/06/02/contact\\_tracing\\_spoofable/](https://www.theregister.com/2020/06/02/contact_tracing_spoofable/)

### Cyber news

Barry Gooch from PROFIT has compiled a report of COVID-19 related news between 23 May to the 29 May 2020 which appears on the following pages.

# COVID-19 RELATED CYBER NEWS
